Wards 2020 ^a Open Access AWARD CONTENT FOR CLIMATE CHANGE 2020 CONFERENCE

Mehdi Azadi^{*}

The University of Queensland, Australia

Climate Change means the difference in the Earth's global climate or in regional climates over time. Climate Change is now a major global concern. Climate change melts the ice. It describes changes in the state of the atmosphere over time scales ranging from decades to millions of years. These changes can be caused by processes inside the Earth, forces from outside (e.g. variations in sunlight intensity) or, more recently, human activities. Ice ages are prominent examples. Climate change is any significant long-term change in the expected patterns of average weather of a region (or the whole Earth) over a significant period of time. Climate change is about abnormal variations to the climate, and the effects of these variations on other parts of the Earth. Examples include the melting of ice caps at the South Pole and North Pole. These changes may take tens, hundreds or perhaps millions of years.

Professional Level (The Research Contribution Award)

The Research Contribution Award is for highly experienced professional (10+ years) who has made significant discoveries, made important advances in his or her chosen career path in the area of Climate Change in the public or private sector. Part-time research experience would be counted as pro-rata. It is calculated starting from the date when you obtained the (first) degree entitling you to embark on a doctorate (either in the country in which the degree was obtained or in the country in which the researcher is recruited), even if a doctorate was never started or envisaged. The applicants can be nominated through online.

Scholar Level (The Upcoming Researcher Award)

The goal of this Upcoming Researcher Award is to support developing scientist, researchers and experts (10+ years) with innovative research works of excellence related to the area of Climate Change. It will provide the best platform to expand your network by widely discussing your research advances and their outcome. Presentation includes 25-30 minutes of oral talk on the <u>scientific</u> research topics based on the theme of the conference along with 5 minutes panel discussions. The applicants can be nominated through online.

Best Keynote Speaker in Climate Change 2020

This Award is for speaker who gives interactive key note presentation to inspire and motivate participants. It will be given to the speaker who has made significant contributions advances in their projects, strategies, and schemes and successfully implemented to improve longterm excellence in Climate Change. The deserving applicants can be nominated through.

Best Poster Presentation in Climate Change 2020

The Best Poster Awards is given to the student and recent graduates for an outstanding research presented as a poster. All accepted abstracts will be presented at the poster sessions during the conference. It provides a launch pad for sharing the significant research related to Climate Change. It gives a framework to visually summarize your work, to engage others in discussion and opening to entice others to learn more by reading full paper.

Outstanding Masters/Ph.D./Post Doctorate thesis work Presentation in Climate Change 2020

This Award is part of the <u>conference</u> to support <u>young</u> <u>researchers</u>, with the intention of supporting young researchers in their quest to advance the frontiers of science across a broad range of Immunology. This Award has been designed to recognize outstanding young scientist and researchers who have made significant contributions in their area of research. The deserving applicants can be nominated through online.

Climate Change 2020 supported by the organizing committee network of renowned scientific and professional expert such as Dr. Mehdi Azadi, The University of Queensland, Australia, provided a platform for collaboration among colleagues, vendors, and academia to reveal new innovations, solutions, ideas, and emerging technologies in Chemistry.
