### World summit on Psychiatry disorders, Mental Health and wellness Philadelphia, USA

Uqbah Iqbal\*

Researcher, Department of Political, Social and Economic History, National University of Malaysia, Malaysia

We successfully finished our previous meeting of “World summit on Psychiatry Disorders, Mental Health and wellness” which is organized by Allied Academies at Philadelphia, USA during June 24-25,2019

Psychology aims to be able to predict the future behavior from the findings of empirical research. If a prediction is not confirmed, then explanation is based on might need to be revised. Mental Health 2019 took amusement in providing great opportunity for all the Scientists, Researchers, Research Scholars, Graduates, to Scrutinize the Contributions of knowledge to share and explore new research developments

[Mental Health 2019](#) brings together researchers, eminent investigators, medical practitioners, scientist, professor, eminent speakers and other key people to discuss about the innovative research and to exchange ideas and experiences in the field of Child Psychology and Adolescent Medicine at an international platform. Organizing Committee also invites young researchers and students to have quick access to the knowledge shared by their peers that might advance their research hence help them to produce community-engaged research that improves the lives of children, adolescents, and families.

We had received an Instantaneous response from the Organizing committee members as well as Speakers and Delegates who had participated in this conference. If there's a researcher whose work you admire, it can be both inspiring and educational to meet them and to talk to them directly. If one of your academic speakers is speaking at a conference, this could be the perfect chance for you to meet them. Who knows, maybe a little chat could lead to the future collaboration!

#### The Highlights of the Conference are:

Psychiatry, Forensic and Emergency Psychiatry Child and Adolescent Psychiatry, Geriatric and Adult Psychiatry, Psychotherapy, Dementia, Cognitive behavioral Therapy, Psychopharmacology, Alzheimer's Disease, Telepsychiatry, Personality Disorders, Psychology, Neuropsychology and Neurodegenerative Disorders, Mental Health and wellness, Women and Mental Health, Bipolar disorders and Schizophrenia, Sleep disorders and Lancet Psychiatry.
